Practices happen every Saturday at 10:00AM and Wednesdays at 7:00PM in the Du Pont upper matted courts.

Building W11, Main Dining Room

Want to have fulfilling discussions at MIT through interfaith dinners starting Tuesday 10/3? Addir, the interfaith dialogue group on campus, has a special event series just for first year grads and undergrads!

Addir is the ancient Sumerian word for bridge, and in Addir, we believe in building bridges across differences in order to build understanding, compassion, and collaboration. Dialogue across lines of difference is a fundamental skill for making friends at MIT and navigating both personal and professional matters, and is one those skills can only be developed through practice.

What better way to practice than over yummy free food and through interesting prompts? The dinners are a 3-part series to learn about ourselves, community, and the broader world on 10.3, 10.24, and 11.14 from 5 pm to 7 pm in the main dining room of W11. The dinners will be a warm and friendly space to explore big and small questions with other first years, along with some experienced Addir fellows as well. Selections from the Woods Hole Film Festival: The Space Race
Wednesday, November 15, 2023 at 6:00pm to 8:00pm
MIT Museum, The Exchange
314 Main Street, Gambrill Center, Cambridge MA 02142

As America raced to beat the Soviet Union to the moon, a Black astronaut candidate came closer to launching into space than anyone we ever knew. In THE SPACE RACE, directors Lisa Cortés and Diego Hurtado de Mendoza profile the pioneering Black pilots, scientists, and engineers who joined NASA to serve their country in space, even as their country failed to achieve equality for them back on Earth. From 1963, when the assassination of JFK thwarted Captain Ed Dwight's quest to reach the moon, to 2020, when the echoes of the civil unrest sparked by the killing of George Floyd reached the International Space Station, the story of African Americans at NASA is a tale of world events colliding
with the aspirations of uncommon men. The bright dreams of Afrofuturism become reality in THE SPACE RACE, turning science fiction into science fact, and forever redefining what “the right stuff” looks like, giving us new heroes to celebrate and a fresh history to explore.

$5 for MIT ID holders

Disability Visibility: First-Person Stories from the Twenty-First Century provides a glimpse into the rich complexity of the disabled experience and highlighting the passions, talents, and everyday lives of this community. Britney Wilson - Associate Professor of Law and the Founding Director of the Civil Rights and Disability Justice Clinic at New York Law School, Wilson has litigated federal civil rights cases on a range of issues including discriminatory policing and disability rights. Wilson contributed "On NYC'S Paratransit, Fighting for Safety, Respect, and Human Dignity" to the collection.

Part 2 of the program will bring these issues home to MIT, featuring staff and student perspectives on navigating the Institute with a disability.

Combining music from Mozart's last opera “The Magic Flute,” and set in the super-charged re-imagined laboratory of MIT inventor Harold (Doc) Edgerton,

“Dr. Faustus Lights the Lights” will have performances on 16, 17, and 18 November 2023 in the main theater of W97.
